

## Content

36 Cards

All the shapes have decided to have a party. Now they are looking for friends to connect and play together. At the end everybody will be having fun as a big group!

## How to Play

**5** The game follows until somebody plays the last card in the hand

**1** Shuffle the deck and give three cards to each player

Leave the rest of the cards on a face down deck

**2** Start the "Party Pile" by revealing 1 card from the face down deck

Party pile

**4** Just like the previous player, everyone else needs to put down a card that matches the one on top of the pile

**3** The first player needs to play a card that either matches the shape or color of the card atop the party pile

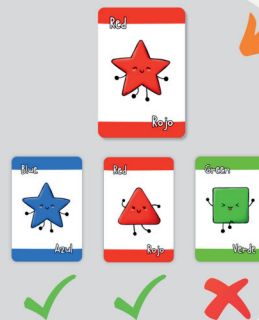

Place the chosen card on the top of the Party pile

## Objective

To be the first one to finish the cards in your hands

If the player has no matching card, he/she should take 1 card from the face down pile and pass the turn to the next player.

# FAQ by Shapes:

I have more than one matching card on my hand, what should I do?

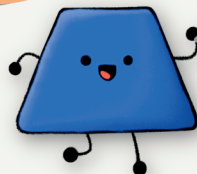

Choose one to play. You only can play **ONE** card each time.

What does it happen if there is no more cards on the face down pile?

No worries! Reshuffle the cards on the party pile back to the stack

## Special colour

You can customize the "your color" cards with your favorite color to add an extra personal touch to the game!

It is better if you choose a different colour from the ones already in the game

I got a matching card from the stack, can I play it immediately?

No, you need to wait for your next turn

## Have Fun!

- When you play a card, shout out its colour and shape. It helps you learn faster.
- Feeling up for a challenge? Can you say it in another language? How about Spanish?
- Create fun ways to finish the game (jump, put your hands on the head and shout Shapes!, etc).
- If you come up with a new fun way to play "Shapes", let us know!
